Climate Change and Environmental Awareness Level 2

Course Overview

This course is designed to provide you with a deeper understanding of the pressing global issues of climate change and environmental degradation, and equip you with the skills to make informed decisions that contribute to the sustainability of our planet.

Climate change is an existential threat to our planet, and the need to act quickly and decisively to mitigate its impact cannot be overstated. In this course, you will learn about the science behind climate change, its causes, and the impact it is having on our planet. You will gain an understanding of the principles of sustainability and environmental protection, and how you can play a role in promoting these practices.

The course also covers the impact of industry on the environment, and how businesses can operate in a way that is both profitable and environmentally sustainable. You will learn about strategies for reducing waste, improving resource efficiency, and promoting a circular economy.

By the end of this course, you will have a comprehensive understanding of climate change and environmental awareness, as well as a range of practical skills that you can apply in your daily life. You will be able to make informed decisions that promote sustainability and environmental protection, and contribute to creating a better world for future generations. Join us on this journey towards a more sustainable future.

What is the cost?

As a result of government funding, this qualification is currently offered at no cost. However, please note that the number of funded places can be limited. To ensure you secure your spot, we recommend booking early.

How do learners benefit?

Taking the Climate Change course would benefit learners by providing them with a deeper understanding of the critical global issues of climate change and environmental degradation.

Learners will gain practical skills and knowledge on how to make informed decisions that promote sustainable practices, reduce waste, and contribute to the global effort to combat climate change.

This course will be particularly useful for those interested in working in fields related to environmental management, sustainability, or corporate social responsibility.

By taking this course, learners will be equipped with the necessary knowledge and skills to create a more sustainable future and contribute to a healthier planet for generations to come.
