Data Protection and Data Security Level 2

Course Overview

Welcome to the Data Protection and Data Security Level 2 course. In today's world, data is a valuable commodity, and protecting it has become more critical than ever before. As a result, this course has been designed to provide you with an understanding of current data protection legislation and how it is applied in practice. You will also learn about organisational procedures concerning data and how to protect against possible threats to ICT systems and data.

Moreover, this course will help you understand the consequences of not protecting data and the impact of possible breaches. This course will cover essential topics such as data breaches, cyber threats, and how to identify and mitigate them. By the end of this course, you will have a better understanding of the importance of data protection and data security, and how to implement best practices to safeguard against potential risks. So, let's get started on this exciting journey of learning and exploring data protection and data security.

What is the cost?

As a result of government funding, this qualification is currently offered at no cost. However, please note that the number of funded places can be limited. To ensure you secure your spot, we recommend booking early.

How do learners benefit?

Taking the Data Protection and Data Security Level 2 course would benefit learners by providing them with an understanding of current data protection legislation, organizational procedures concerning data, possible threats to ICT systems and data, and how to protect against them.

This knowledge would help individuals comply with legal requirements, avoid penalties for non-compliance, ensure that the data they handle is secure, and reduce the chances of data breaches and cyber-attacks.

Furthermore, learners would appreciate the importance of data protection and data security, which they can apply in their personal and professional lives. This course would be valuable for anyone looking to develop their knowledge and skills in data protection and data security, regardless of their field of work.
