# Understanding Cancer Support Level 2

## Course Overview

Welcome to the Level 2 Course in Understanding Cancer Support. This course has been designed to provide you with a comprehensive understanding of cancer and the support that is required for those affected by this disease. The course covers a range of topics, starting with cancer awareness, which provides an introduction to what cancer is and how it affects the body. We then move on to the diagnosis and treatment of cancer, exploring the various types of cancer and the different treatment options available.

One of the main focuses of the course is on cancer care and support. You will learn about the various types of support that are available for people affected by cancer, including emotional support, practical support, and spiritual support. The course will also cover the role of healthcare professionals in providing cancer care and support, and the importance of multidisciplinary working.

Finally, the course will provide an introduction to end of life and bereavement care. This can be a difficult and sensitive area, and the course will help you to understand the needs of patients and families during this time, and how best to support them.

By the end of the course, you will have a comprehensive understanding of cancer and the support that is required for those affected by it. You will be equipped with the knowledge and skills to provide compassionate and effective support to those going through a difficult and challenging time.

## What is the cost?

As a result of government funding, this qualification is currently offered at no cost. However, please note that the number of funded places can be limited. To ensure you secure your spot, we recommend booking early.

## How do learners benefit?

By taking the Level 2 Course in Understanding Cancer Support, learners would gain a deep understanding of cancer and the support needed for patients and their families. The course would be particularly beneficial for those working in healthcare or social care, as well as for those who have personal experience with cancer.

The course covers the important area of end of life and bereavement care, which is a sensitive and challenging topic, and provides learners with the knowledge and skills necessary to provide compassionate and effective support during these difficult times.

Overall, the course would equip learners with valuable knowledge and skills that can positively impact their personal and professional lives.
